

Business Plan 2008-09

As SUS has now entered its fourth year of operation the funding agreement with sportscotland has come to an end. The Chair, Executive Officer and Sports Programme Manager have been asked to develop a longer-term strategy for the organisation going forward which will be submitted to sportscotland for review in the coming months. This plan will outline key areas of activity that SUS will be working towards over the current years. Future funding will then be linked to areas of activity that are identified as priorities.

As the starting point for the development of new strategic thinking the SUS exec is invited to offer thoughts on areas of development for SUS over the next few years.

Areas for future work may include:

- Forging Links with FE sector
- Enhancing the Physical Activity and Health Agenda
- Developing Coaching and Volunteers
- Support for Major Events (e.g Olympic and Commonwealth Games)

This work will be carried out by the SUS officers, but more so by the constitutional committees, in order to develop a cohesive and effective long-term vision for SUS and its partners.

This paper will be one of the key priorities for SUS officers over the next few months.

SUS Executive is asked to:
